EXPERIENCE

Cisco <i>Technical Intern 1</i> - Built a full-stack dashboard mapping CLI commands to TDL/YANG models, reducing lookup time from 5h → under 30s (98% faster). - Automated cross-reference analysis across 4+ structured interfaces in Python, eliminating repetitive effort. - Delivered SSH-based distributed execution used by 20+ engineers, saving 10+ hours weekly each. - Standardized automation with SDLC best practices, reducing workflow failures by 40% and enhancing reliability. - Engineered a zero-installation SSH tool for remote analysis, cutting new engineer onboarding from 60+ min to under 2 min.	Bengaluru, India <i>Jan 2025 – Jun 2025</i>
Fidelity International <i>Technology Intern</i> - Reverse-engineered 100,000+ lines of MetaMask code to design a secure custodian wallet for institutional key management. - Developed a secure key-signing server and dashboard with ReactJS, ExpressJS, and Ethers.js, reducing private key exposure risk to 0%. - Collaborated in a 10-member Agile team, boosting sprint velocity by ensuring 100% on-time code reviews and CI/CD pipeline health.	Gurugram, India <i>Jun 2024 – Jul 2024</i>
Siemens <i>Software Engineer Intern</i> - Delivered ChatConnect, a web app enabling real-time messaging for 500+ users, integrating role-based access control and encrypted storage to ensure secure communication. - Integrated Spring Security (bcrypt + JWT HS256), passing penetration tests with zero authentication failures. Increased internal communication efficiency by 30% compared to email workflows. - Implemented modular Spring Boot architecture with REST APIs, reducing feature integration time by 25% and enabling easier microservices migration.	Gurugram, India <i>Jun 2023 – Jul 2023</i>

EDUCATION

Jaypee Institute of Information Technology <i>B.Tech. in Computer Science Engineering</i>	Noida, India <i>Oct 2021 – Jun 2025</i>
New Kingston Senior Secondary School <i>Senior Secondary (Class XII), 92.4%</i>	Kanpur, India <i>Jul 2020 – Jun 2021</i>

TECHNICAL SKILLS

Languages: C++, Java, Python, JavaScript, SQL
Frameworks & Libraries: ReactJS, NodeJS, ExpressJS, Spring Boot, REST APIs
Databases: PostgreSQL, MySQL
Tools: Git, GitHub, Jira, Agile, Scrum, WebRTC, SSH, CI/CD
Concepts: Backend systems, Full-stack development, API design, Authentication & Security, SDLC, Unit Testing, Data Structures & Algorithms

ACHIEVEMENTS

CodeChef 5-star (2068, Top 0.2% globally)
Codeforces Expert (1732, Top 0.8% in India)
NTSE Scholar (2019): Top 0.2% nationwide (Top 2,000 out of 1M+ students)

PROJECTS

eVaarta – WebRTC Video Conferencing <i>NodeJS, ReactJS, WebRTC</i> - Deployed video conferencing platform for 50+ users, achieving 20% lower latency than baseline. - Designed REST APIs for multi-peer communication, reducing response times by 30%. - Scaled to 100+ test users with minimal server load via WebRTC's server-less architecture. - Deployed and load-tested platform on cloud-ready infrastructure, improving system scalability and reliability.
--

POSITION OF RESPONSIBILITY

Knuth Programming Hub, IIIT <i>Coordinator</i> Coordinated Knuth Cup, an ICPC-style programming competition at Impressions 2024 with 100+ participants, overseeing problem setting, event logistics, and judging	<i>Jul 2023 – Aug 2024</i>
